

January 2020 Newsletter

Your site has been updated to version 3.1.8 with various bug fixes and improvements, some of which are listed below.

After logging into Dealer Choice, press and hold the CTRL + SHIFT + R keys to refresh your browsers cache.

Features and Enhancements in this release:

(1522) Vendor invoice entry with mapped line items.

When entering a vendor invoice and mapping invoice line items that have decimal quantities, a rounding error message was displayed preventing the invoice from being saved. This has been corrected.

(1521) Customer List balance display is incorrect.

The balance due field in the Customer List was displaying an incorrect amount due balance. This has been corrected.

(1518) Delivery Ticket, **New Feature** - ticket notes will not be saved.

Previously, delivery ticket notes were retained by Dealer Choice and would print on every delivery ticket going forward. This feature has changed and the Delivery Ticket Notes will no longer be saved for each user. Notes must be entered for every delivery ticket, if desired. If a delivery ticket comment is added and the settings are saved as a template, the comment will be included in the saved template settings.

(1517) Delivery Ticket, **New Feature** - Proposal Description print option.

A new Delivery Ticket print option called Proposal Description has been added to the Delivery Ticket General Print Fields section. When selected, this will allow for the Proposal Description text to be included on the Delivery Ticket.

(1516) Delivery Ticket, **New Feature** - Install Notes print option.

A new Delivery Ticket print option called Install Notes has been added to the Delivery Ticket print options. All notes that have been entered on the Install Tab – Install Notes section will be displayed and all, if any, install notes will be selected to be included the Delivery Ticket. If you wish to have no install notes displayed on the delivery ticket, you can either de-select all notes, or de-select individual notes. Install Notes will print above the line items by default. We have included an option to allow you to select the install notes to be printed below the line items as well with the “Print Install Notes Below Line Items” check box.
